Adding a Cisco switch running to MARS has two distinct steps. First, you add the base module of the switch, providing administrative access to that device. Second, you add any modules that are running in the switch. For instructions on performing these two steps, refer to the following topics:

- Add and Configure a Cisco Switch in MARS

Configuring AAA Devices - Cisco

To enable basic operation, you must complete the initial configuration of the MARS Appliance as described in Install and Setup Guide for Cisco Security Monitoring, Analysis, and Response System. In addition, you must specify the device name and reporting IP addresses of the reporting devices as described in Adding Reporting and Mitigation Devices .
