Planning, scheduling is an important part of the construction management. Planning and scheduling of construction activities helps engineers to complete the project in time and within the budget. The term ' Construction ' does not only denotes physical activities involving men, materials and machinery but also covers the entire gamut of activities from conception to realization of a construction project.

The scheduling process provides the contractor with a more thorough and structured planning process while they are reviewing the plans and figuring out the sequence for building the project. Most importantly, it gets the “ plan ” that is in someone ’ s head down on paper, where the rest of the team can understand, review and critique it.
