Peter Morville, the co-author of Information Architecture for the World Wide Web, explains the role of an information architect as a person who bridges users and content by designing search and navigation, embodying the abstract ideas into prototypes, units, and disciplines to turn the concepts into something understandable. An information architect who works along with a UX designer can concentrate solely on information architecture design, while a UX designer devotes more time to research.

Information Architecture for Web Design: Step by Step...

Information architecture is to a website, library or shop, what the concrete foundations are to a house. To create the best possible foundations, we need to create an IA document. Creating the document happens in a few stages that will be explained below. Companies should spend time on this, and see it as a worthwhile investment.

A Beginner's Guide To Information Architecture in UX (2020)

Information architecture (IA) is a science of organizing and structuring content of the websites, web and mobile applications, and social media software. An American architect and graphic designer, Richard Saul Wurman, is considered to be a founder of the IA field. Today, there are many specialists working on IA development who have established the Information Architecture Institute.
