Valves & Flow Regulators. Splitting and regulating water flow in multiple directions is particularly useful for pond filters and water features, as a single pump can be used to perform multiple tasks. The OASE 3 Way Water Feature Distributor can be fitted to a hose or directly to a pump, allowing the water output to be split and controlled in two or three directions.

~~Valves & Flow Regulators Water Garden UK~~

Isolating valves, also known as an isolation valve, are used to regulate the flow of water from the mains to a water service pipe. They are very handy and perfect for fixing things like a dripping tap where there is no need to turn off the mains water if one of these valves is installed.
